

THE SLEE SLEIGH

TAKING THE EFFORT OUT OF DEER CARCASS EXTRACTION

The 'SLEE SLEIGH' is fast becoming the industry standard for extracting deer carcasses from the hill in even the most challenging terrains: Rough, Rocky, Soft, Snowy, Steep or Flat! You name it - Wherever your Quad/ATV can go, The 'SLEE SLEIGH' **will** be right behind you!

This innovative product – developed by the designer and manufacturer through years of practical experience - makes the 'SLEE SLEIGH' by far the **easiest** and not to mention **safest** method for extracting deer from the hill.

The pre-installed trailer hitch means it can hook up to any ATV such as Quad, Argocat and most other 4 X 4's.

Key Features:

Strength

- 1 Will easily handle 3 sizeable red deer and 5 roe deer (or other smaller breeds) at any one time
- 2 Rigid but lightweight, galvanised steel frame
- 3 Rigid steel drawbar

Durability

- 1 Skin made from high-density polyethylene (or HDPE) – renowned for its durability
- 2 Replaceable, hard wearing steel runners
- 3 All steel galvanised to ensure longest possible lasting protective coat

Health and Safety

- 1 Eliminates back problems caused by dragging deer or other traditional methods
- 2 Foldable, lightweight design - easy for 1 person to handle, saving space in your motor vehicle or trailer when transporting to the field and for ease of storage when not in use
- 3 Frame has eyelets for tying deer down for safer transportation

Food Standards

- 1 Protects the flesh of the deer from getting bashed and bruised when extracting from the hill
- 2 Tarp (which can be purchased separately) will also keep the carcass clean
- 3 Easy washdown of sleigh to maintain hygiene – vital in maintaining food handling standards

Stability

- 1 Rigid steel drawbar
- 2 Steel Runners act as guides and keep the Sleigh on track behind ATV

Customers & Endorsements

Widely used by the Forestry Commission and Forestry and Land Scotland as well as to private / contract game keepers throughout the UK, with hundreds of units having been sold to date.

The 'SLEE SLEIGH' is now also being exported overseas to Scandinavia and other parts of Europe.

"Using the 'SLEE SLEIGH' is fundamental part of deer carcass recovery process, allowing us to work both safely and in line with best practice."

Richard Eadington
Wildlife Ranger Manager, Aberfoyle and Trossachs

"The 'SLEE SLEIGH' is very competitively priced given the quality, reliability and functionality of the product – especially given the rough terrain we cover."

Extracting deer this way all but eliminates the potential for carcass damage, as well as injury to operatives."

Alasdair Cameron
Wildlife Ranger Manager, West Region
